

MSRS – Technical Implementation Expert Statement of Work

Question:

Is more information available regarding the work product from Phase 1?

Response:

Yes. Work product in the form of network schematics will be available for viewing by appointment at:

MSRS

60 Empire Drive, Suite 300

St. Paul, MN

Please contact Sue Willinger at 651-284-7727 to schedule an appointment.

Security concerns limit access to our network redesign. No copies or pictures may be taken of the schematics.

The goal of Phase 2A (Technical Implementation Expert) of this multi-phase, which in part, runs concurrently with Phase 2B (Network Product Evaluation and Selection), is to keep the network design vendor-neutral and have an open product evaluation in Phase 2B. The contractor awarded Phase 2A will have significant input into the evaluation and selection of products in Phase 2B. For that reason, the vendor selected for Phase 2A will not be eligible for Phase 2B.
